

ALBILEX[®]-NanoRain

ALBILEX[®]-NanoRain produces an invisible micro-coating on glass panes. This long lasting, weather resistant and cleaner resistant micro-coating sealing is extremely water- and dirt-repellent, improving visibility even without using windscreen wipers.

Application

Apply ALBILEX[®]-NanoRain to a soft, dry cloth and rub into the clean, dry pane. Dry and allow to work for approx. 5-10min. Then buff until streak-free with a dry cloth. Two applications improve the effect.

Do not apply to painted or plastic surfaces. Wipe up accidental drips immediately using a damp cloth.

Storage

When stored properly inside the original sealed packaging, the product has a minimum shelf life of 24 months.

Components

ALBILEX[®]-NanoRain is based on an alcohol solution of activated organosilicon compounds.

Delivery form

ALBILEX[®]-NanoRain is available in 200ml spray bottles (item no.: 120402), 1000ml spray bottles (item no.: 120401) and 10 litre cans (item no.: 120410).

Further information

Please see the material safety data sheet for information on classification, labelling and other information regarding safe handling.
